# Falpi

*From the very beginning, since 1987 Falpi has the clear ideas:  
to bring the enthusiasm and innovative spirit of a young and  
motivated team into the world of "professional cleaning".*

Now, after more than 30 years of constant effort, we have added another quality which is just as important : the experience of a company with an in-depth knowledge of cleaning-related problems that knows how to solve them quickly and efficiently.

# Passion and Design for Cleaning

We have found many partners worldwide who share our passion for their work, the quality of our products and the principles behind our choices.

**PRODUCT**

This simple word includes two fundamental ideas: quality and strength.

So, every product must be conceived, designed and produced according to these clear goals and Falpi constantly strives to achieve its goals.

**SOCIAL QUALITY**

As a company, we asked ourselves if quality is only linked to the product and production procedures. And we realised that the word "quality" can mean many things that, when combined, create a company/society/environment system in which each one of us finds his rightful place and makes his contribution.

**SERVICE**

Over the years, we have invested heavily in customer care. This effort now means we can guarantee the very best service in terms of speed and accuracy.

**ENVIRONMENT**

Looking after the environment must guide our actions: our environmental and social commitment is a question of lifestyle, a choice that we simply view as our duty.

01 - Falpi

# What We Do

## TEXTILE PRODUCTS

In 1987, we started our business venture producing the first Falpi products, starting from the world of textiles. Kentucky mop and dust-mops were the basis we used to create, step by step, one of the most comprehensive and popular ranges of professional cleaning tools.

### **CLEANING TROLLEYS**

At the beginning of the 1990s, the mechanical production department was set up which enabled us to expand our offer over time to include trolleys. A comprehensive, well-structured range, from two-bucket trolleys with a traditional washing system to more complex Microrapid and KubiPro service trolleys, which are particularly popular in hospitals.

### **CLEANING TOOLS**

*"Whatever the challenge, choose the right equipment".*

This motto is our source of inspiration and our "modus operandi" with which we face the challenges that very day brings, viewing them as an opportunity of growth. "Cleaning as a job" means providing the best equipment, without complicating matters, and using tools and accessories specifically designed for the purpose.

01 - Falpi

# Our Quality

Since its birth, in 1987, Falpi has clear ideas: bringing into the world of professional cleaning equipment the energy and the will to make innovations of a young and well-motivated team.

Today, after 30 years wholeheartedly, we can add another quality, so precious: our experience about "cleaning" problems which we are used to solve, in a rush and well.

In a world where everyone try to make the production abroad with a low cost of labour, Falpi choose to remain loyal to the quality of real "Made in Italy" protecting the Italian production value, its advantages on quality and the attention to the man and environment.

Qualities which for us are not just words, but represent the anchorages of a business ethic from the project to the achievement.

Falpi products, projected for cleaning companies, hospital, companies and communities, made following Customer demands are created only with materials completely recyclable.

Buying a Falpi product, you choose an highest quality item which can proudly wear the Italian flag because it is not only projected but, above all, made in Italy.

In Falpi we pay attention to the problem if Quality is linked just to the product and to production procedures.

So we figured out how today Quality means many things that all together, create a company/society/environment system in which we find our dimension and to which we contribute.

We are now aware that a company has the duty to deal not only with the market but also with the world.

A world that influences it and is on its turn influenced by it, that evaluate it, and which can be a source of health or, if bad-conducted, of "uneasiness".

We, therefore, believe that Falpi cannot be managed as a purely economic element and before choosing a product we have to assess its environmental and social impact. These are the reasons why, today, all our efforts are aimed producing the best possible product, also to be in harmony with the principles which are at the basis of what we call "Social Quality".

Our principles:

- **Respect for the law**
- **Protect the Made in Italy**
- **Always operate commercially with full transparency**
- **Guarantee our proficiencies**
- **Respect for the environment**

# Falpi Configurator

create your own trolley  
right up to the order

<https://www.falpi.com/en/sy>

Create your trolley in a few  
up to the order request, by

<https://www.falpi.com/en/systems/systems/it-cleaning-systems/configurator>

Create your trolley in a few simple steps, up to the order request, by selecting the components from those available and verifying their technical characteristics. The first step is to choose the family of trolleys that you want to customize (KubiPro, Soli or Solight Housekeeping).

Once the choice of the family has been defined, it is possible to select the components among those available, checking their code and description.

It is an intelligent tool because, based on the selections made, it automatically excludes all non-feasible combinations.

During the configuration, the user sees in real time the construction of the trolley in 3D based on his selections (not available for the trolleys of the Solight Housekeeping range).

Once the configuration is complete, you can request a quote directly, or send an order.

solight  
house keeping

<https://www.falpi.com/en/configurator/solight>

With this tool, practical, quick and easy to use, you can configure the trolley according to your needs and requirements in a completely autonomous way.

# CollegaMe

COLLEGA ME, the *smart* system by Falpi.

For Falpi, innovation means simplification: we want to make yesterday's job easy, simple, quick and efficient, in preparation for future challenges.

CollegaMe is Falpi's cloud platform for the "smart" management of a series of operations which are essential for tomorrow's cleaning company.

CollegaMe allows you to analyse, in real time, the position and the route of trolleys, cleaning machines and articles you want to monitor. You can easily communicate with operators, send and receive information, work instructions and alerts automatically, only when and to whom required. You can ascertain in real time where cleaning procedures have been finished. CollegaMe works both indoors than outdoors thanks to iBeacon and Gps technologies.

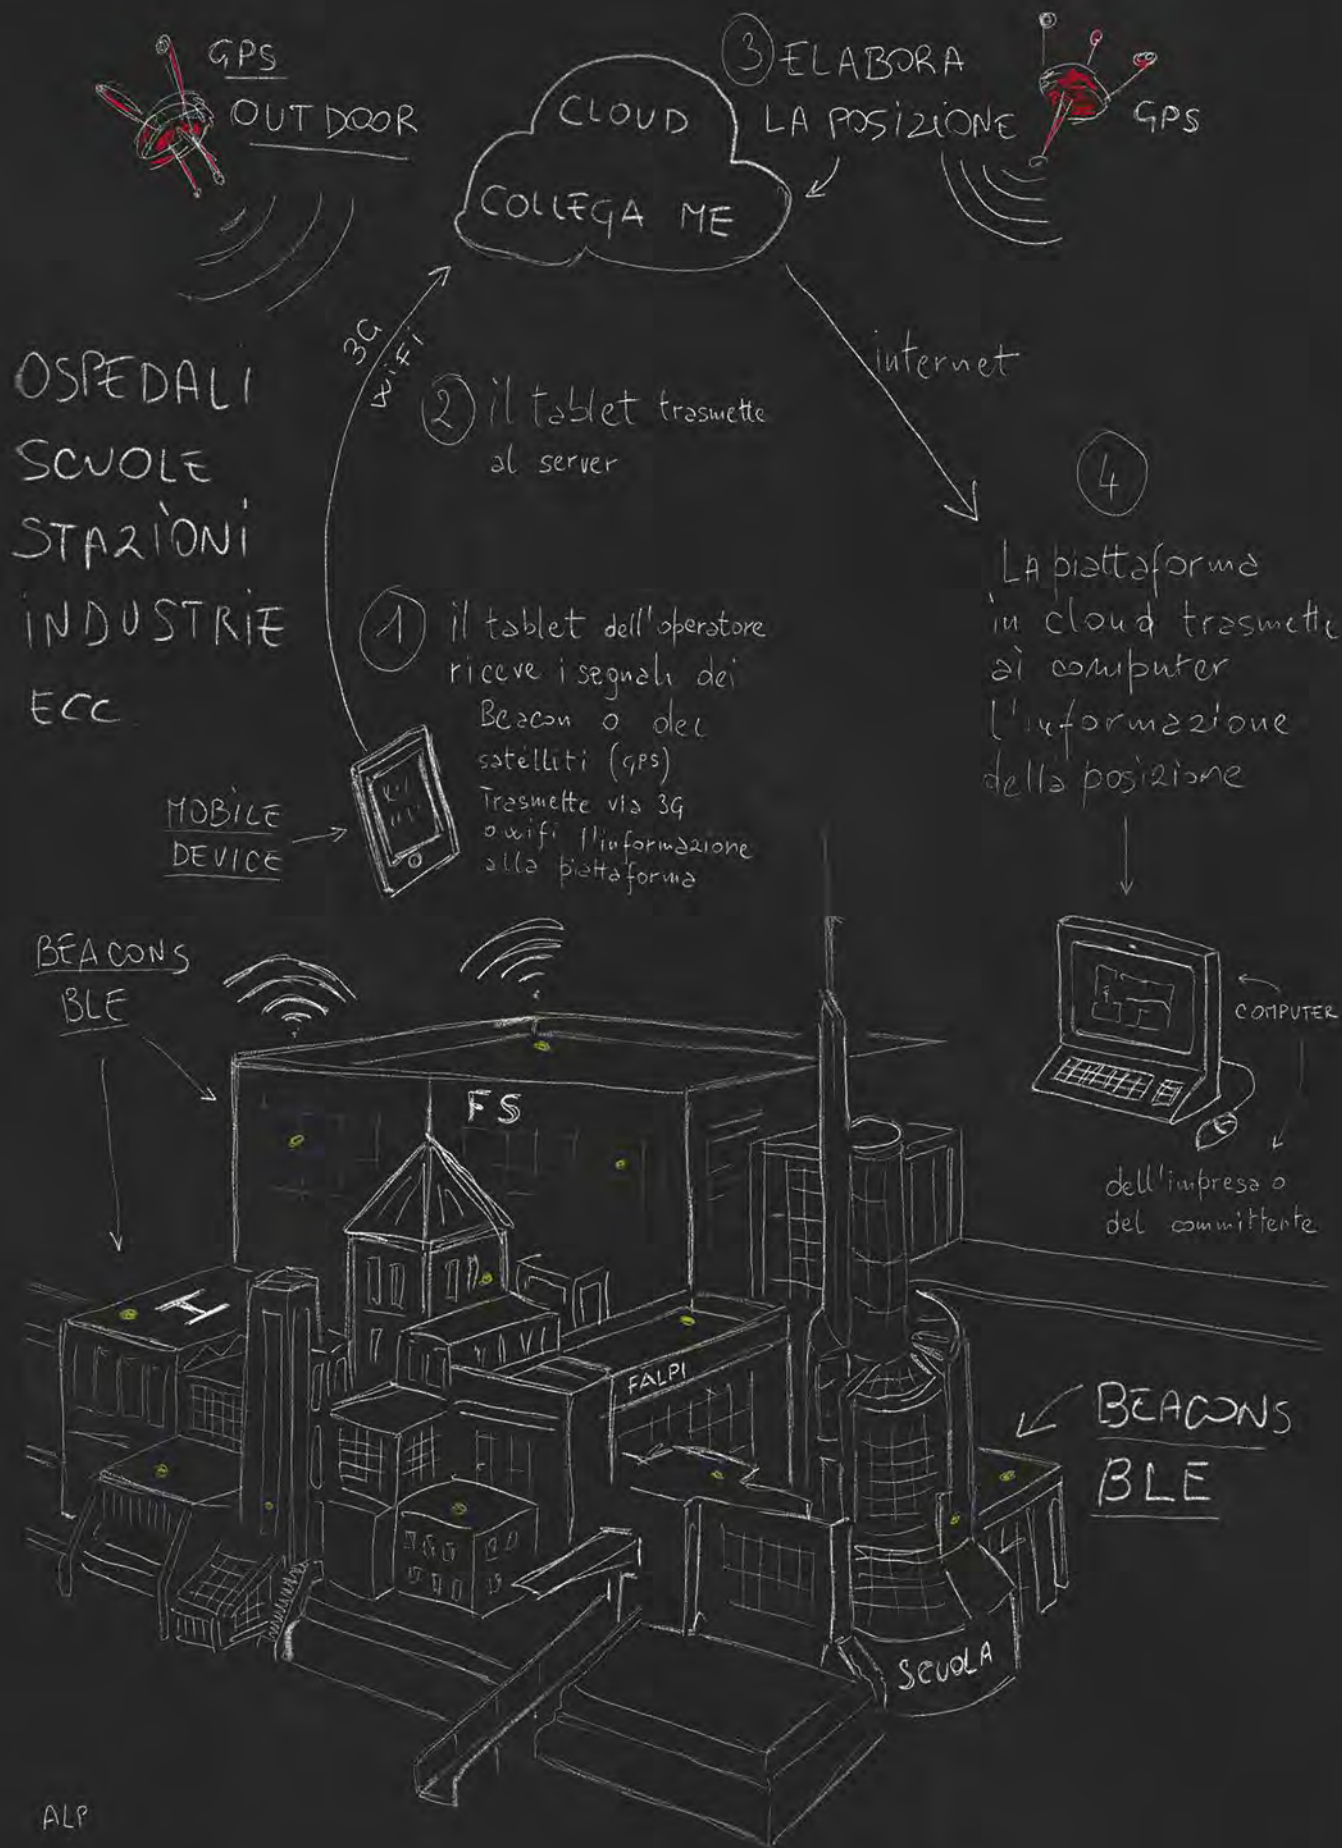

We give access to the CollegaMe platform only to cleaning companies which use our products. It is a new way to support those companies which appreciate the way we work!

CollegaMe allows you to:

- track the real-time position of trolleys, machines and articles
- view movements in real time on indoor maps (previously uploaded by the user) or outdoor on google maps
- send and receive notifications, pictures, alerts and information
- automatically send work instructions when, where and to whom required
- remotely check the beginning and the end of shifts
- extract customised reports which can be revised

... and much more!

# Environment

*Environmental protection is not an option,  
it's everyone's duty.*

**Protection, caution and care are the principles to apply if we want to reconcile economic development with future well-being.**

As with whatever humans do, we use the air, water and earth around us. These resources are available to everyone, but they will not last forever. They are an asset that we must preserve intact for future generations and this undertaking involves some commitments by both individuals and companies.

The attention for the environment must guide our actions.

Falpi has made its environmental and social commitment a question of lifestyle, a choice that we simply consider our duty.

## 02 - Environmental

# Product Certifications

## ReMade in Italy

ReMade in Italy is the only accredited third-party certification that is aimed at all products and materials in Italy. For this reason, having the ReMade in Italy certification entails concrete advantages for participation in public tenders. The "high level" promotion takes place through the issue of certification: the product is an expression of the maximum guarantee of a production that takes place in compliance with legislation and the environment.

ReMade in Italy carries with it a double message: on the one hand, it fully expresses the concept of the Circular Economy, that is the material that is recreated with the

minimization of waste; at the same time, there are other environmental aspects related to recycling that Remade in Italy values and accounts for: saving CO2 emissions into the atmosphere and energy efficiency related to recycling. At Falpi, we were the first in the professional cleaning sector to certify our dry plastic containers, with high percentages of recycled material, Remade in Italy. Made in Italy, innovation, sustainability, aesthetics and functionality have always been part of all our projects, and environmental commitment is one of the first aspects that we take always into consideration.

## Ecolabel EU

EU ECOLABEL is the environmental label for the product of the European Community. In this context full of every brand and logo, this label qualifies products that go beyond a strict selection of environmental compatibility criteria determined by European Community. The EU ECOLABEL, based on ISO 14024 regulation, is described by the Nation Action Plan of Green Public Procurement (PAN GPP) as “...a main reference...” for cleaning products assessment more respectful for the environment. This label is often confused with other environmental label type 1 of National nature (mainly used in other countries of the European Community), EU ECOLABEL is the one well recognised and common in Europe.

We decided to certify with EU ECOLABEL five groups of textile products, and 4 models of wheeled cabinet with a process which took on our Quality Office for more than four years in a long and demanding way. For Falpi this certification is not just a simple mark on a product, it is not just a “label”, but the result of a constant modus operandi which involves the company and its policies. Do not make the mistake to consider certifications as the arrival point they are just the beginning of a long way! Identifying a product certified EU ECOLABEL is easy: you can identify it by the typical logo with the flower and you prove its validity on the website

<https://www.isprambiente.gov.it/it/attivita/certificazioni/ecolabel-ue/prodotti-certificati>

## EPD - Environmental Product Declaration

EPD is an environmental certification with the aim to supply concrete, checked and reliable information on the environmental performances of a product or a service. Following the regulatory perspective, it is defined as an Environmental Label of Type III. EPD analyses the entire cycle of life of a product or a service, from cradle to the grave.

For Falpi is a source of pride can declare to be the first company, in the cleaning professional sector, to take up the road of EPD certification of its product, according to the regulations ISO 14040. We have decided to have the range Microrapid, Microtech, Smart and Kubi trolleys certified EPD to demonstrate the top-level of environmental compatibility of our production.

02 - Environmental

# System Certifications

## Ethic Certification

Falpi best characteristic is the respect for the dignity: in a market even more competitive, where despite the rule of civil life, there are manufacturers who consider the exploitation of manpower as a qualifying aspect in their capacity to contract, Falpi chooses to be certified Certification SA 8000: 2014.

Falpi shows in this way, to all the parties involved (employees, companies, suppliers and financial backers) its own undertaking in pursuing practices, procedures and policies which may ensure a behaviour that is not detrimental to the person's dignity.

## Quality Certification

For Falpi quality is an attitude which involved all the tasks of the company and translates into its policy, characterized by ongoing improvement and full transparency. With ISO 9001 certification, Falpi guarantees its customers qualified products and services,

which are continuously supervised, from the design through the whole production cycle, and perfectly meet the technical specifications for their use in the different application sectors.

## Environmental Certification

The impact of our quality: the best on your work, zero on the environment! The approach of the company to the environmental themes is clearly identifiable in the range of inox and Rilsan trolleys: products with highest quality and technology, designed to meet Customer's demands, which are produced with material

and processes with zero environmental impact and, therefore, after a very long working life, 100% recyclable. The Environmental Certification ISO 14001:2004 offers a structured approach to define the environmental objectives and the identification of the instruments necessary to achieve them.

## 02 - Environmental

# Environmental Awards

## Clean Green Award

The Clean Green Award Afidamp is the annual recognition of products, systems or services, of the professional and industrial cleaning sector, with a strong environmental aim. In 2009 Falpi was awarded in the equipment category, with the Microrapid 2 trolley (the first trolley with environmental certification EPD). In 2010 and 2011 edition Falpi was named with in the Mention of Merit of the jury and described as "...the company driver in the sector of the professional cleaning in the environmental field." In 2014, for the fourth contest edition, our environmental aim has been again a warded with the reward of the new microfibre Ultrarapid Ecolabel EU wet-mop.

## Ecolabel EU National Award 2017

During the 25th anniversary of the Ecolabel brand, Ispra (Higher Institute for Environmental Protection and Research) rewarded the company with the 2017 EU Ecolabel National Award: *"The study and application have led to combine the philosophy of the brand with an avant-garde design: the result is an innovative and patented product, able to reduce wear and increase resistance and cleaning efficiency, respecting sustainability and a lower environmental impact during the entire life cycle"*.

## Ecolabel EU National Award 2020

On the occasion of the event held on November 24, 2020 Ispra (Higher Institute for Environmental Protection and Research - Ecolabel section) wanted to reward our company *"For the best design innovation for reducing environmental impact"*, with the following motivation : *"The study and application have led to combining the philosophy of the brand with the avant-garde design, following the creation of the yarn*

*throughout the production chain: the result is an innovative and patented product, capable of reducing wear and increase resistance and cleaning effectiveness, always respecting sustainability and with a view to lower environmental impact during the entire life cycle, also with an interest in the principles of social responsibility"*. This award was given to the new Falpi wet-mop Mikro K.

## Ecolabel EU National Award 2021

On Tuesday 28 October 2021 on the occasion of the Ecomondo Fair in Rimini, we were awarded the prestigious EU Ecolabel Emas award with the motivation:

*"The company has nominated the Kubi Pro Big-Foot Mobile Cabinet for professional cleaning, recently certified EU Ecolabel.*

*Item characterized by physical resistance performance and exceptional stability.*

*It is innovative as it is made with materials that lead to positive impacts on the*

*environment, through the greatest possible extension of the product life cycle, without burdening production costs.*

*The Mobile Cabinet is designed for disassembly, allowing for repair, reuse and recycling.*

*This product is unique and innovative in the world of professional cleaning, in fact Falpi Srl is the only company in Italy to have certified the EU Ecolabel for this type of product"*. This award was given to the new Falpi model Kubi Ecolabel.

# Sweeping

*Sweeping system and  
surfaces mopping.*

**For cleaning of the floors it is essential, before washing, a careful sweeping of the surfaces, to get excellent results.**

Originally created for the sanitary sector and now used for cleaning every kind of location, sweeping and dusting systems, in the "disposable" or re-usable versions, are technically and economically the most efficient solutions for cleaning small and large surfaces catching dust and dirt of all kinds. Easy learning to use, reduced physical exertion, low dispersion of dust in the air and excellent efficacy are the strong points which have contributed to the wide diffusion of flat sweeping system. Falpi range for flat sweeping offers the most professional articles available on the market: in addition to the classic cotton fringe it is now available in microfibre MICRODUST, a complete range of impregnated cloths, tools and frames of every kind, everything severely "Made in Italy".

- 26 - 31 Sweepy
- 32 - 37 Damp Sweeping
- 38 - 43 Surfaces Dusting

### 03 - Sweeping

# Sweepy

The threads of the dust-mops reach everywhere, even in the most difficult points like coins and edges too, reducing the dispersion of the dust into the environment. It is possible to fit a hemmed gauze with holes in it for a more accurate “dry” and “wet” cleaning.

The mopping is the classic and low-cost method, fast and efficient, to clean small and large surfaces.

## Components

### FOLDING FRAMES / FIXED FRAMES

Folding frame, with plate and plastic join, is available in 40-60-80-100 cm sizes.

Fixed metal frames are available in 110-130-160 cm for wide surfaces and to improve the performance.

### MOPS WITH LACES CLOSURES / MOPS WITH POCKETS

Sweepy refills are available in microfibre, cotton or acrylic (blue fringe).

All the Sweepy dust-mops (cotton, acrylic, microfibre) are available with pockets or with laces closures.

### 03 - Sweeping

# Damp Sweeping

The easiest, the best method, irreplaceable for total dust removal from surfaces. Lighter frames reduce physical force on the part of the cleaning worker with the best performance and the minimum effort.

The impregnated cloth collects and retain dust, hairs and all types of impurities absorbing it into its own weft thanks also to the mechanical action of the supporting frame. In order to make the operations easier reducing the obstacles, has been created Dual-Tech: a single tool for sweeping and washing.

## Components

### DUALTECH FRAME

Dual-Tech frame a single tool for two activities.

### ALU-WING & ALU-TECH FRAMES

The Alu-wing aluminium frame allows excellent sliding over the floor. Thanks to its washable pad it keeps the gauze in the correct position even in the presence of irregular floorings.

### IMPREGNATED CLOTH

The impregnated cloths certified EU Ecolable, are available flat or in practical or in pre-cut rolls.

## Dualtech Frame

*Two in one.*

**Dual-tech allows you to use the same equipment both for sweeping and washing, it simplifies cleaning operations and reduces the obstructions.**

Light and strong, thanks to its soft rubber tubular sheets, Dual-Tech allows to dust efficiently floors and, soon after, to be used for washing with microfibre mops. Unique and patented it can be used by washing methods Microrapid and Microtech.

Use Dual-tech both with impregnated cloths and with microfibre mops: you will save, time and space.

By SWEEPING soft tubular sheets let fit the impregnated cloth to the floor for a perfect cleaning.

**A thin hooked slat keeping the cloth in the right position.**

### 03 - Sweeping

# Surfaces Dusting

Not often considered for its real importance the operation of "dusting" surfaces is actually essential to guarantee true environmental hygiene.

HB BILL is useful and efficient on smooth surfaces both vertical and horizontal.

Tables and desks, doors and mirrors, windowsills and walls can be cleaned in a while and with great efficiency.

## Components

### BILL & HB BILL FRAMES

Bill and HB Bill frames helps the mops reducing time and strain.

### BILL CLOTHS & MICROTECH MOPS

The Bill cloths in ultra-microfibre allow washing and drying surfaces in one wipe. The Microtech microfibre mops is used for a first rough cleaning the dirt from the surface before the use of the fringes Bill.

### MICROFIBRE CLOTHS & DUSTERS

Microcloth the more used in the healthcare scope:

- ORANGE cloth for dry cleaning dust or greased.
- SILVER cloth the best to wet cleaning of sanitary fixture.
- BLUE cloth the "expert" for glasses and mirrors.

# Washing

*A complete range of products to satisfy every demand of  
“professional cleaning”.*

**The cleaning professional want the best, and a professional range must offer the right solutions for all the demands.**

The different types of flooring, different sectors of application, grade of dirt to be removed, different kind of detergents frequency of cleaning and the demands of the customers are the fundamental elements which determine the choice of the right equipment for the need of the moment. Besides the more traditional washing methods such as the cotton mop, in Falpi's Washing range we further find the new microfibre mop MICROWASH, and a complete selection of wet-mops for flat surface washing.

**04 - Washing**

# H<sub>2</sub>O

## Washing

Washing with Kentucky mop is the traditional washing system, easy to use, suitable both for large and small surfaces.

Increasingly it is found in its ideal application on very heavy and accumulated dirt.

**CUT-END MOPS****LOOPED-END MOPS**

## Components

### MOP-WRINGER H<sub>2</sub>O & PLASTIC MOP HOLDER

The plastic mop wringer for Kentucky Mop or flat mop, strong and designed.

The plastic mop-holder for Kentucky Mop and for every kind of handles.

### MOP FIXED HOLDER & KENTUCKY MOP

Cut-end mops are recommended for rough surfaces and floors.

Looped-end mops are ideal to collect dirt and prove more resistant to use and washing.

#### 04 - Washing

# Flat Washing

Falpi put the first roll press on the Italian market in 1989 (during the exhibition "Pulire" in Bari), since then flat washing has been the most used system in all environments. The great yield and optimal results make it indispensable not only in the sanitary sector, since flat washing is ideal to remove every kind of not too deep dirt.

Frame are fitted with button or wing fixing systems and allow wringing the wet-mops without these coming into contact with hands, for maximum safety and great comfort.

**FRAMES FOR FLAT WASHING**

MULTI-CLACK and CLACK frames are fitted with pedal release which make it easier to use.

**CLACK WET-MOPS & MULTI WET-MOPS**

MULTI and CLACK wet-mops are available in the version specialmix (white and grey) and in microfibre.

The continuous fringes (bouclé) are ideal to capture and retain dirt thus ensuring higher resistance to use and washing.

The area/colour code label allows choosing the different wet-mops by application areas.

**04 - Washing**

# Rapid Washing

In the healing sector the hygiene is really important: for this reason Falpi invests in research in developing methods even more efficient for hospital cleaning. The RAPID system, the "classical" double passage washing system for hospital and healthcare. Pure cleaning solution, quick use and high quality are its strong points. RAPID wet-mops are appreciated for their unbeatable resistance to repeated washing achieved thanks to the quality of the materials used in production.

**RAPID FRAMES**

The RAPID frames are made of resistant plastic material. Its pedal coupling/release device is practical and efficient. They are available in the sizes 40x11 and 50x13 cm (with small wheels at the end to ensure an easy fixing of the wet-mop).

**RAPID WET-MOPS & ECORAPID WET-MOPS & JACKY WET-MOPS**

The continuous fringes (bouclé) are ideal to capture and retain dust thus ensuring higher resistance to use and washing.

Rapid wet-mops are available in specialmix (white ad grey) and in microfibre version. The area/colour code label allows choosing the different wet-mops by application areas.

#### 04 - Washing

# Microrapid Wasing

It's been over fifteen years from the first presentation of MICRORAPID WASHING SYSTEM. Today, as in the past, we have the qualitative primacy of a teaching method which, above

all thanks to the quality of the microfibre used by Falpi, is the point of reference of the professionals of the sector.

Microfibre is the word used in the textile sector to define those fibres with count lower or equal to 1 Dtex (decitex). Dtex is the weight in grams of 10000 metres of yarn, this means that one gram of microfibre can cover (at least) a 10 km distance. Yarns are extremely "thin", becoming the most efficient in the cleaning operations. The microfibres used in the cleaning sector are produced using nylon and polyester bi-component. The intrinsic structure increase the fibre "usable surface", thus allowing dirt to penetrate inside and then to be captured and retained. Microfibre attracts dirt by means of electrostatic action when it is dry and by mechanical and capillary action during wet washing.

**MICROFIBRE**

**COTTON FIBRE**

**MADE IN FALPI**

All wet-mops produced by Falpi are identifiable by a sewn label which certifies its origin. The serial number allows identifying the production date of the wet-mop.

**FRAMES**

Aluminium frame, practical and easy to use. Its lightness makes it less tiring to use and suitable for washing vertical surfaces.

**MICRORAPID WET-MOPS & MICROTECH WET-MOPS &  
ULTRARAPID WET-MOPS & GRATTINO WET-MOPS**

Microfibre wet-mops are available with backing cloth LOOPFIX and HONEYCOMB 3D in different colors.

The continuous fringes (bouclé) are ideal to capture and retain dirt thus ensuring higher resistance to use and washing.

## 05 - Light Products

# Light Products

Falpi has studied the Light range for those who do not need the performances of a professional article, without renouncing its convenient use. Light products have a very strong quality-price ratio.

Light range is a selection of the most popular items for a non-strictly professional use; it is perfect to participate in tender notices, ensuring the quality of Falpi products.

# Washing Instructions

*It is simple to guarantee a Falpi textile product great efficiency over a long period: it is enough just to follow some practical advice. There follows a quick guide to consult when doing first washes and at any time when doubts or problems may arise.*

## WASHING INSTRUCTIONS FALPI TEXTILE PRODUCTS

### ICONS ON THE LABEL ABOUT WASHING INSTRUCTIONS

-  Wash the new textile before using them the first time
-  The washing phases (pre-washing, washing, rinsing, and spinning) must be respected and not modified or "skipped" by operator
-  Pre-washing must be done solely with water, so as to remove all trace of disinfectant or detergent
-  Do not use fabric softeners during the wash
-  When washing pay scrupulous attention to the instructions given, in particular to how much detergent is used and to the water temperature
-  Avoid, when possible, the use of dryers
-  Always respect the load quantity recommended for the washing machine used

## Legend

Normal wash max temperature 30°

Normal wash max temperature 60°

Normal wash max temperature 90°

No dry-cleanable textile

Only bleach with oxygen based - do not use chlorine di-oxine based

It is unable to be treated with chlorine

It cannot be dried in hot air in tumble drier

# Handles and Frames

*Quality  
in details.*

**Our handles and frames are characterized by the use of fine materials such as the aluminium, fiberglass and nylon.**

They are used, day by day, by cleaning operators who appreciate their strength, right balance, lightness and beauty.

# KUBI Trolleys

*The generation of modular trolleys,  
completely user-adjustable.*

**A new concept of closed trolley: a resistant, compact and aesthetically attractive structure, which includes all Falpi's experience and reliability.**

An accurate choice of raw materials to obtain a unique product, just like all our trolleys. KUBI is modular, can be converted, if needed, and designed to be long-lasting. It is the perfect solution wherever the trolley needs to hide its content: shopping centres, schools and offices can now count on a product which has been specifically designed for their needs.

All KUBI models are available in 4  
colors.

86 - 87 Choose your base  
 88 - 107 Kubi-Pro  
 108 - 111 Kubi-Box and Kubi-Box Minimal  
 112 - 115 Kubi-Fun

116 - 117 Soli & Soli PRO  
 118 - 119 Kubi Special - i-Kubi and Kubi Robot  
 120 - 123 Kubi Kid and Stickers  
 124 - 125 Kubi Ecolabel

## 07 - Kubi Trolleys

# Choose your Kubi base size

The range of KUBI trolleys allows you to choose between 3 different basic models:  
*Large, Medium and Small.*

The *Large* base (with a size of 87x47x9 cm) is used in the models of the Kubi Pro range.

The *Medium* base (with a size of 68x47x9 cm) is used in the models of the Kubi Fun range.

The *Small* base (with a size of 46x46x5 cm) is used in the models of the Soli and Soli Pro range.

## Size guide

### SMALL

L = 46 cm

P = 46 cm

H = 5 cm

 soli

### MEDIUM

L = 68 cm

P = 47 cm

H = 9 cm

 kubi fun

### LARGE

L = 87 cm

P = 47 cm

H = 9 cm

 kubipro

**07 - Kubi Trolleys**

# Kubi Pro

Standard models completely modular and customizable according to customer needs.

Kubi trolleys comply with the CAM-GPP standards (Legislative Decree 51 of 29/01/2021) and they are EPD certified (Environmental Product Declaration).

## LARGE BASE

**Set up your KUBI trolley**

<https://www.falpi.com/en/configurator/kubi>

## WHERE TO USE?

- Restaurants
- Toilettes
- Healthcare Facilities
- Hospitals
- Offices
- Fitness/Wellness Centers
- Schools/ Kindergartens
- Companies
- Swimming Pools
- Spa
- Campings

### LIGHTNESS

The plastic and aluminium structure makes the trolleys both light and resistant.

### ENDURANCE

Aluminium brackets, screws and accessories are made in stainless steel.

### ELEGANCE

Simple and modern design enhance a sober and refined appearance.

### MANOEUVRABILITY

Wheels, mounted on ball bearings, are suitable for more challenging paths.

# Kubi 1

It is made to be used with a pre-impregnated washing system. The shelves in the closed compartment guarantee ample carrying space. Possibility of using the color code. The double collection bag (fringes and waste) is hidden inside the closable panels that can be locked (optional). Available in three different configurations.

# Kubi 4

This is the classic configuration of community-centre trolley. It is used where there are floors which can be cleaned with a traditional washing system (mop-wringer) or with flat washing system (monoroll wringer). It has a structure appropriate for carrying the materials that can be easily secured behind the key-locked door panel. The upper and the lower folding supports for waste bag are made in stainless steel, in addition the lower support for bag has been designed with a wheel that serve as reinforcement.

# KUBI BOX 2019

MAX 30 Kg

Organize the materials transported inside of a drawers key-locked  
it is now possible with KUBI-BOX!

The transport of personal effects could be efficiently separated from cleaning materials.

KUBI-BOX drawers are assembled on metal runners with cushioning mechanism.

They are designed and made for professional use and long life.

KUBI

Customize your KUBI-BOX trolley from our website with our configurator:

<https://www.falpi.com/it/configurator/kubi>

To view prices you can contact us by mail at [info@falpi.com](mailto:info@falpi.com).

# Kubi-Box Minimal

The Minimal trolley is part of the KUBI range. Extremely compact, it exploits all available space to optimize cleaning operations while maintaining a neat and elegant appearance. Ideal for cleaning in restaurants, cafes, offices and, in general, in small environments.

Set up your KUBI trolley

<https://www.falpi.com/en/configurator/kubi>

**Rubber wheels ø 150 mm**

## 07 - Kubi Trolleys

# Kubi Fun

Kubi Fun is the new range of Kubi trolleys which is more compact than a Kubi Pro and more functional than a "double bucket" trolley.

With Kubi Fun it is now possible to choose a trolley with reduced dimensions able to maintain the same characteristics and quality of a trolley with a "large" base.

## MEDIUM BASE

**Set up your KUBI FUN trolley**

<https://www.falpi.com/en/configurator/kubi-fun>

## WHERE TO USE?

- Restaurants

#### KUBI FUN...

... It allows you to use the *pre-impregnated* washing system, as required by the CAM (Minimum Environmental Criteria), occupying the same space as a trolley with a traditional system.

BASE SIZE: **cm 67x47**

BASE SIZE: **cm 77x43**

# Kubi Fun

## FUNCTIONAL

Choice of high or low uprights as needed.

## LIGHTNESS

The plastic and aluminium structure makes the trolleys both light and resistant.

## CONFIGURABLE

Fully configurable and customizable.

## COMPACT

The compact structure allows you to use the vertical spaces.

## MANOEUVRABILITY

Wheels, mounted on ball bearings, are suitable for more challenging paths.

## 07 - Kubi Trolleys

# Soli & Soli Pro

The *Soli method*, created specifically for the cleaning service in confined areas, can also be used in those non-sanitary contexts where a “*disposable cleaning method*” is required to limit the possibility of the spread of pathogens.

## SMALL BASE

Set up your SOLI trolley

<https://www.falpi.com/en/configurator/soli>

Soli Pro is a **compact, maneuverable and functional trolley, with a tidy and professional appearance**. Soli Pro **takes advantage of vertical space by minimizing the footprint on the ground** to be able to move in tight spaces, including furniture and equipment; thanks to internal drawers and containers, it offers all the spaces necessary for positioning the equipment necessary for the service.

**Distributed in Italy by Soligena** ([www.soligena.it](http://www.soligena.it)).

SOLI PRO WITH ACCESSORIES

SOLI WITH ACCESSORIES

## 07 - Kubi Trolleys

# Kubi Special

**i-Kubi** is equipped with large 305 mm wheels suitable for the heaviest use. It is equipped as standard with a support shelf for the washer-dryer machine and a special shaped hook for fixing the i-Mop machine. Customizable with the KUBI accessories line.

**Kubi Robot** is a trolley for transporting the Fimap equipment and machines necessary for the recovery operations, without tiring out the operators. Kubi Robot Big-Foot is equipped with two large 305 mm wheels, suitable for the heaviest use, and two rubber wheels ø 150 mm. By using the Kubi Robot Big-Foot trolley, the risks of occasional accidents during the transfer of materials to the rooms to be recovered are eliminated.

## 07 - Kubi Trolleys

# Kubi Kid

Kubi Kid is Falpi's proposal for all those contexts frequented by children: from the pediatric wards of hospitals, to nursery schools, to children's centers.

It is available in all configurations of the Kubi range and therefore **maintains all the quality and performance certifications of the original line.**

In addition to the aspects of compactness, versatility and ergonomics, the playful aspect is also added here: the ability to customize the trolley with cheerful and colorful stickers.

The “all closed” design of Kubi allows you to keep chemicals and equipment away from the extraordinary and innate curiosity of children, ensuring their safety!

# INOX Trolleys

*Quick, light, stainless... strong:*

*Falpi style!*

**Who works everyday in cleaning sector know perfectly that some instruments are daily friend in work and must be efficient, safe and “friendly”.**

Falpi's range of inox products is the result of “compromise less” technical choices exclusively aimed at the user's satisfaction. Entirely produced from inox AISI 304 using zero impact processing cycles, the INOX TROLLEYS for professional cleaning places all the quality of Falpi's experience at disposal of those who wants to make a long-term investment.

Also available in special versions for hospitals, industrial plants and communities, INOX FALPI TROLLEYS offer structural and ergonomic solutions that are unique and intended to increase speed, comfort and productivity of the cleaning operators.

The INOX TROLLEYS include the Microrapid system, which is undoubtedly the most imitated in the market.

128 - 143 **Smart**  
 144 - 159 **Yo-Yo**  
 160 - 165 **Specialist**

166 - 183 **Microrapid & Microtech**  
 184 - 185 **Clean Room**  
 186 - 187 **Mop**

## 08 - Inox Trolleys

# Smart

**SMART trolleys are the results of technical choices for the professional market in residential cleaning sector.**

They are used in offices, schools, companies and in horeca world. All the SMART trolleys are customised with a range of specific accessories and guaranteed 2 years. The supporting frame of SMART trolleys, in inox AISI 304, is guarantee of long lifetime and maximum resistance.

All the materials are completely recyclable.

## 08 - Inox Trolleys

# Specialist

**Made thanks to the experience of the consumers.**

**Solutions to the market are offered to guide it. It is uncommon that the operators lead it with their demands. Falpi stand out even in this choice!**

We all along measures ourselves with the cleaning operators: they are our focus for the development of new products.

SPECIALIST are equipment designed to solve demands born on cleaning site in particular and extreme conditions. At the base of SPECIALIST there are always special procedures; the trolley is not, anymore, a single instrument, but the whole part of a complete system: an innovate approach of professional cleaning!

All the materials are completely recyclable.

## 08 - Inox Trolleys

# Microrapid and Microtech

**Semplicity is the real innovation.**

**It's been fifteen years ago from the first presentation of the cleaning system**

**MICRORAPID: the first system impregnated... the more imitate!**

All along these years we have changed the consolidate habits in the world of cleaning, working to perfect the product and improve the procedures to make them easier, efficient, respectful of the operators and environment.

Our efforts are always focused to simplify: for Falpi this is the real innovation!

## EQUIPPED TROLLEY

# Clean Room

**Manufacturing processes which need to be carried out in clean room are constantly increasing.**

Pharmaceutical, electronic and food industries, plastic materials production, research laboratories and many more sectors require a growing attention to cleaning processes, according to standards which can not be compared with normal procedures. Falpi proposes a range of Clean Room certified products in order to satisfy these specific needs.

This trolley is made in stainless steel and specifically designed for Clean Room use. It can be sterilized with high temperature autoclave.

Available only on order

# HOTEL Trolleys

*Where the elegance  
is important.*

In certain contexts, besides practicality, aesthetics also plays a part. It was to adapt them the most prestigious environments that the Hotel Falpi trolleys has been created.

Among their strong points there are solidity, elegant steel structure and the possibility to be customised according to the customer's demands.

solight<sub>housekeeping</sub>

**10 - Hotel Trolleys**

# Solight

## Housekeeping

The Solight trolleys by Falpi are hardly noticeable, harmonizing with any type of furniture, from the most classic to the most modern and technological: a range of trolleys designed and manufactured for the hotel sector, full of various models that satisfy any functional and aesthetic need.

# Eco-Friendly

*When a technical choice  
becomes "responsible".*

**Sustainable development "meets the needs of the present without compromising the ability of future generations to satisfy their own".  
(Gro Harlem Bruntland - Norwegian Prime Minister - 1987)**

When being "ECO" was not trendy Falpi started a journey, not for business operation but for our natural vocation, to a sustainable production. From over twenty years we have applied the concept of "sustainability" to our buildings, our technologies, and to the way to lead our company always and however!

Today, what we have always done for our inner certainty becomes, for many companies, Marketing operation: the "market" want it, the legislator requires it for the public authority, and we pursue it for belief!

244 - 247 EPD

248 - 251 Ecolabel EU - Textiles

252 - 253 Ecolabel EU - Wheeled Cabinets

254 - 255 ReMade in Italy

## 11 - Eco-Friendly

# EPD certified products

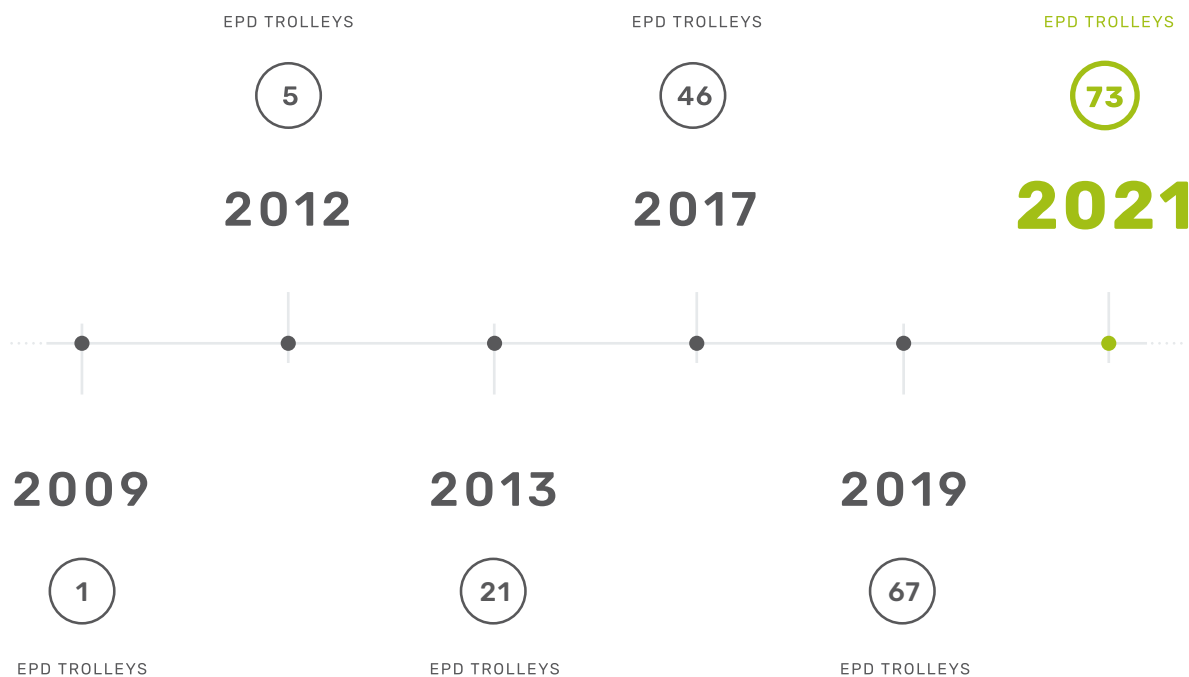

### 73 EPD certified Falpi's trolleys.

Many of the Falpi Inox trolleys can be proud of the environmental innovative label EPD.

We believe that communicate to the market the environmental value of a product must be always done basing on international schemes shared and checked by "Third Parties". With EPD certification we established the environmental impact of the certified products on the whole cycle of life: a new and modern way to communicate our effort for the environment.

# Textiles

## ECOLABEL EU certified

### 187 ECOLABEL EU certified Falpi's references.

Certify with EU ECOLABEL a textile product for cleaning is a difficult and challenging operation. A choice which Falpi made for 5 groups of products; a way which involved our Quality Office or more than four years.

Now Falpi can guarantee the maximum environmental compatibility on a wide range of its textile products and particularly on the washing microfibre mops...and this is just the beginning!

# Wheeled Cabinet ECOLABEL EU certified

### 4 Kubi ECOLABEL EU certified.

In 2021 we decided to certify ECOLABEL EU as many as 4 Kubi Ecolabel models with a process that has engaged the Quality Office for over ten years, through a complex and challenging path.

Thanks to this certification Falpi has also obtained the Ecolabel Award 2021 as Best Design Innovation for the Reduction of Environmental Impact, with the following motivation: *"The company has nominated the Kubi Pro Big-Foot Mobile Trolley for professional cleaning, recently EU Ecolabel certified.*

*Article characterized by performance of physical resistance and exceptional stability.*

*It is innovative because it is made with materials that lead to positive impacts on the environment, through the longest possible life cycle of the product, without burdening production costs.*

*The Mobile Trolley is designed for disassembly, allowing repair, reuse and recycling.*

*This product is unique and innovative in the world of professional cleaning, in fact Falpi Srl is the only company in Italy to have certified EU Ecolabel this type of product."*

# ReMade in Italy certified products

43 ReMade in Italy certified Falpi products.

ReMade in Italy is the third-party certification that allows you to declare the content of recycled material, expressed as a percentage.

Falpi has decided to certify the dry containers of its trolleys, obtaining the environmental label on 43 products, for which the recycled material is greater than 50% of the total.

# Accessories

*Beyond  
the standard*

**Not everybody is satisfied of the standard: actually, our experience teaches us that many companies, as also many customers or single operators, want customised solutions with accessories and changes almost “tailor-made”.**

Only who, as Falpi, knows deeply this field, understands what the customer wishes, and is able to meet the particular demands.

To make the difference, in these cases, is our wide range of accessories which allows turning a standard product into your personal working bench, an instrument to feel as your own and use and “live” as a daily partner.

# Tools

*Small objects  
for big works*

## **Less effort, more efficiency!**

This is the Falpi Tools' slogan, designed and produced with the operator who will use them in mind.

A family which includes over 200 articles which, very often while passing unobserved, result in performing a top quality cleaning service. Every single tool is distinguished by its strength, efficiency, long life cycle, ergonomic look and easy to use; characteristics which allow for maximum cleanliness and hygiene in every environment.

## Windows cleaning range

**Falpi designed and created BILL, the revolutionary system based on microfibre use, which allows for an extremely easy, markless cleaning for windows and mirrors.**

Everyone is able to clean easily and with excellent results, and this delicate task until now entrusted to “window expert cleaners” is today within everybody’s reach. Without having to use detergents but solely a alcohol based product even an inexperienced operator can obtain amazing results.

# Sales Conditions

*Images and drawings included in this catalogue are for mere representation purposes and may change without prior notice.*

*Therefore, when choosing the articles for orders, please refer exclusively to the price list in force.*

## **DEFINITION**

Following general sales conditions are applied for all the agreements stipulated between Falpi Srl and their Customers, save exceptions that must be expressly in the contact involved.

## **SOLD ARTICLES**

The articles produced and marketed by Falpi Srl comply with the safety requisites and are suitable for use.

All data, weights, descriptions and images of the single articles contained in this technical catalogue are approximate. The tolerances of the measures are regulated by the mandatory standards.

Falpi Srl reserves the right to change, at any

time and without prior notice, its articles as appropriate.

## **ORDERS**

Customers must accept our sales condition before issuing a purchase order.

The order must contain the type of article and relevant code, quantity and delivery date.

Orders shall be considered as accepted only after receipt of confirmation in writing.

After 10 days without receipt of acceptance or delivery, the order shall be considered as rejected.

For articles sold by pack, the order shall be made for the entire pack, therefore orders for quantities lower than the minimum quantity

contained in the pack shall not be accepted.

Minimum order amount for invoicing:

€ 500,00.

### **PRICES**

Prices indicated on the catalogue are expressed in Euro and must be understood as net prices and ex factory. Prices will be applied if any change will occur in the price list. Prices of accessories and trolley spare parts must be applied just for purchase purpose and not for breaking down of details from products included in this catalogue.

### **PAYMENT**

Payment of the goods are regulated by established agreements with Customer.

In case of delay of payment overdue interest will be applied as considered by the law, with the effective date of the overdue sent to the debtor. In case of outstanding, bank fee will be charged; by the second outstanding payment, sales conditions will be modified as cash on delivery or advanced payment.

Goods sold by extended payment are considered transferred just by total payment.

The goods delivered will remain property of the manufacturer until Customer will pay the total amount.

### **SHIPMENT AND DELIVERY**

The articles are delivered to the customer perfectly intact and undamaged.

Volumes and weights indicated in the catalog refer to single package. The delivery terms are not final. Any delivery delay does not entitle to delays of the agreed payment terms or to any legitimate claim for damages.

### **WAY OF USE**

Falpi Srl is not responsible for article defects or damages caused by improper use, non observance of ordinary maintenance as well as by tampering or changes thereto.

### **CLAIMS**

The Client undertakes to check the goods upon delivery and to make any claims for damages or defects using the delivery note that shall be countersigned by the carrier. Any defects shall be communicated in writing, also via fax, within the terms provided for by law.

Verbal or via telephone claims shall not be accepted.

No article shall be returned without the expressed consent from Falpi Srl.

### **NOT COLLECTION**

The non-collection of the goods after thirty days from the agreed delivery term, shall cause the cancellation of the sales contract and Falpi shall have the right to hold by way of penalty all the amounts received until that moment, save greater damage.

### **DAMAGES**

In the event of cancellation of the contract due to Falpi's fault, that is when a compensation for damages may be requested from Falpi Srl for causes ascribable to Falpi's responsibility as consequence of sale of goods, Falpi Srl shall not pay amounts higher than the value of the goods sold.

### **COMPETENT COURT**

The court of Biella shall have exclusive jurisdiction to entertain any dispute arising from the goods sold, with expressed exclusion of any other courts.

### **USE OF PHOTOS AND PICTURES**

The images, photos, drawings and in general any kind of representation of Falpi Srl's articles contained in catalogues, price lists, brochures and any kind of advertising materials are exclusively property of Falpi Srl, therefore their use whatsoever nature and means on the part of clients and third parties

is strictly forbidden unless prior written authorization from Falpi.

Marketing and publication whatsoever kind and means of Falpi Srl's articles shall not be marketed and published under anonymous form, on the contrary it shall always be underlined that they are Falpi Srl's articles, unless otherwise authorised in writing.

#### **PRICE LIST**

This technical catalogue/price list cancels and replaces every previous edition.

#### **ACCEPTANCE OF GENERAL CONDITIONS**

The customer declares that he has read the general sales condition set out above and by sending the purchase order he also declares that he has accepted them as a whole.

#### **TRADEMARK**

Falpi Srl trademark, if showed on the items, shall never be removed, cancelled or covered by any means.

The Client's trademark, if any, shall be added to that of Falpi Srl in such a way so as to avoid any confusion with regard to the goods producer.

#### **TRADEMARK USE**

Falpi trademark and Falpi word have been registered and are property of Falpi Srl.

The use of Falpi trademark and Falpi word is just permitted to subjects qualified as operating Customers of Falpi Srl. Operating Customers are considered those who make at least one purchase along one solar year.

The use of Falpi trademark and Falpi word is permitted for advertising purpose and/or promotions just by written demand and courtesy of Falpi for the use indicated in the same to be sent to [info@falpi.com](mailto:info@falpi.com).

#### **PRIVACY POLICY**

In the sense of GDPR n. 679/2016 the processing of personal data will be under the

rules, following the principles of lawfulness and correctness in order to protect your privacy. Your data will be otherwise registered in the compulsory records for the purposes above mentioned, and will be communicate to the organisations in charge when will be necessary for legal obligations.
