

The Range

Clover's colour-coded system for the easy training of cleaning staff

*The **it** Range*

*Colour-coded system
for the easy training
of cleaning staff*

*All about **it**...*

This innovative new range of products has been developed by Clover Chemicals Ltd especially for companies employing large numbers of cleaning staff, such as contract cleaners and hotel groups. The IT range is so named because it has been designed to simplify the **Information Transfer** to users, making the training of staff significantly easier. The unique features of the range are its **colour-coded products** and **clear, pictorial labels**. Featuring seven highly effective products that cover the cleaning of surfaces, floors and sanitary areas, the IT range is ideal for daily contract cleaning in offices, hotels, schools, leisure centres and many other establishments.

Simplifies staff training

The training of cleaning staff is made significantly easier with the IT range, even where potential language barriers exist. Users can be taught to select the correct product for a particular task simply by looking at the product's colour: blue for interior cleaning, green for floors, red for sanitary areas and yellow for surface sanitising. This colour-coding system is already well established in most European countries, and will therefore aid any non-English speakers with product selection.

Improves standards of cleaning

The colour-coding and label design used in the IT range help to ensure that the products are used for their correct application, thus achieving optimum results. The colour-coding can also be extended to the equipment used to apply the products in each different area, therefore minimising the risk of cross-contamination.

Simplifies stocking and reordering

A basic range of three or four products from the IT range is all that is needed for all-round effective daily cleaning. This eliminates the need to buy and stock numerous different types of product.

Multi-lingual Pictogram Guides

Multi-lingual pictogram guides available on Clover's website in most European languages.

The benefits of **it**...

- **Colour-coded labels and liquids, in line with European system** - European cleaners will recognise each product's area of use from its colour, simplifying training.
- **Extensive use of EU-recognised pictograms on labels** - overcomes any potential language barrier when training foreign staff.
- **Multi-lingual pictogram guides** are available on Clover's website in most European languages as an additional training aid.
- **Effective products** - low residue for excellent results on modern surfaces.
- **Surface safe products** - specially selected to minimise any risk of damage.
- **Low hazard potential to operatives.**
- **Standard dilution rate** for all products for ease of use - 1 pelican pump per trigger spray, 4 pelican pumps per bucket.
- **Simplistic range** - just 4 products cover all general daily cleaning of surfaces, floors and washrooms.
- Can integrate with colour-coded mops, buckets and cloths to offer a whole system.

The **it** products...

Blue - Interior

CLEANit

Interior Cleaner

The *it* Range Labels at a glance...

Blue product indicates it is to be used for interior cleaning.

Blue band on label matches colour of product to represent interiors.

Dilution made easy

All the dilutable products in the IT range have the same dilution rate to simplify usage:

600ml Trigger spray:

= 1 x  **30ml**

5 Litre Bucket:

= 4 x  **120ml**

Complete the package...

A2 sized Wall Chart to help aid user training and a great point of reference for cleaners.

To aid identification of diluted product, ready-to-use labels are available for trigger bottles.

Self-adhesive identification **SPOTS** for colour coding of dosing pumps.

Keep 5 litre containers tidy with a 1x5L or 2x5L stainless steel wall bracket.
