SHP Group (Slovak Hygienic Paper Group)

is a multinational company associating the group of production and business companies operating in the cellulose-paper industry. The SHP Group covers 10 companies in 6 countries of Europe with annual turnover of EUR 220 mil. In its six manufacturing plants, the SHP Group makes 170 thousand tons of paper annually.

The SHP Group belongs to the largest producers of hygienic papers in the Central and South-Eastern Europe and is an active member of the European Tissue Symposium (ETS).

HARMONY PROFESSIONAL AND PALOMA PROFESSIONAL

The brands of Harmony Professional and Paloma Professional fall into the SHP Group and cover the products of professional hygiene Away from Home that provide functional solutions in the area of hygiene for public institutions and premises, companies making their business within the HORECA segment as well as solutions for the areas of industry, production, wellness & spa, and healthcare. The brands build on several key values and principles such as tradition, trust, honesty and reliability, flexibility, individual and professional approach. The declared values and principles reflect in the complex approach to customers, in the communication with them, in the production process as well as within the business relations.

Products of the professional hygiene manufactured in the plants of SHP Harmanec, a.s., SHP INTIM PAPIR, d.o.o., SHP Slavošovce, a.s., Paloma d.d. Sladki Vrh and Ceršak are manufactured from semi-finished waste paper products with the FSC certificate declaring a responsible approach of SHP Group when purchasing cellulose and scrap paper. The production raw materials are harmless to health and certified for a short-term contact with foodstuff.

TNS

TNS Group is the largest global agency in the area of marketing research, which on the basis of long-time expertise and outstanding solutions provides its clients with a precise plan and recommendations for further development and growth of their business. The TNS Slovakia has been acting on the Slovak market since 1995 and belongs to the leaders in the area of market research. During its long-time presence it has created a good reputation thanks to its trustworthiness, reliability and expertise. It provides complex services for market research from the design of a project through quality collection and precise data evaluation up to the understandable result interpretation, recommendations and marketing consultations for complex solution of a client's tasks (HYPERLINK "<http://www.tns-global.sk>" www.tns-global.sk).

PRODUCT LINES

The product portfolio of the Away from home segment consists of 3 product lines of paper hygiene – Economic, Comfort, and Premium. Depending on the products' quality the product lines offer toilet paper, jumbo toilet paper, folded toilet paper, folded paper towels, rolled and industrial paper towels, kitchen towels, cosmetic towels, napkins for dispensers and paper napkins.

- **Premium** – products made of 100% pure pulp, two-ply and three-ply paper towels and three-ply runners made of pure pulp in the P2P quality, suitable for demanding customers looking for high degree of comfort.
- **Comfort** – products made of white, natur and green recycled paper with higher quality and cellulose, two-ply paper napkins made of cellulose, high-quality products specified for medium demanding customers.
- **Economic** – products made of recycled paper and one-ply paper towels made of cellulose, economical and ecological choice for a wide spectrum of customers.

Besides the standard offered products within the individual product lines the SHP Group offers also a possibility of customized solutions based on the customer's demands and production capabilities.

TOILET PAPER

TOILET PAPER

Toilet paper is an inevitable part of toilets. An important decision-making criterion when selecting a toilet paper is primarily an optimal combination of functional properties like firmness, softness and fineness, colour and whiteness, number of plies, absorbency, winding, size of rolls and solubility (TNS, 2015).

- **SMALL ROLL TOILET PAPER**
 - **JUMBO TOILET PAPER**
 - **FOLDED TOILET PAPER**

SMALL ROLL TOILET PAPER

SMALL ROLL TOILET PAPER

The roll toilet paper, for which the functional qualities must be accompanied also by an aesthetic function, is suitable for the places with lower frequency of visitors, HORECA facilities, more luxurious and representative areas. The two-ply and three-ply toilet paper with decorative embossing is primarily appropriate for these areas. For the facilities where the attention is put on the functional properties and value for money is the one-ply and two-ply roll toilet paper with microembossing or edge embosser. The length and type of paper is adapted to various requirements and types of customers.

JUMBO TOILET PAPER

JUMBO TOILET PAPER

Toilets with higher frequency of visitors have typically higher consumption of toilet paper. The requirements for this kind of product are functionality, good solubility, sufficiently long winding and value for money. Jumbo toilet paper with the roll diameter of 19 and 26 centimetres (TNS, 2015) is the most frequently required product. The combination of paper, various winding lengths and functional microembossing or joining the plies with edge embosser allows the customers to choose the economical solution. Use of the jumbo toilet paper reduces the demands for frequent change of toilet paper in the facilities which are exposed to high number of visitors and at the same time it is the economical choice too.

FOLDED TOILET PAPER

FOLDED TOILET PAPER

Folded toilet paper is a suitable product for facilities that require not only functional properties of a product but also the value for many. Product is specified for dispensers that protect the unused sheets. From the point of view of hygiene this product is optimal for HORECA facilities that do not need to change the toilet paper after the exchange of visitors in a room but the dispenser is easily refilled with the needed number of sheets. The optimal combination of white recycled paper or pure pulp and microembossing with little waves is not only functional and economical but at the same time an aesthetic solution for toilets and bathrooms.

PAPER HAND TOWELS AND DISPENSER NAPKINS

PAPER HAND TOWELS AND DISPENSER NAPKINS

Hand hygiene, washing and wiping of dirty and wet surfaces and their polishing is an integral part of workplace. The important decision-making criterion when selecting the paper towels is an optimal combination of qualities like economy, absorbency, softness, firmness and compactness, perforation and easy separation of sheets in the dispenser (TNS, 2015).

FOLDED HAND TOWELS

FOLDED HAND TOWELS

The optimal variant for hand hygiene are folded paper towels which take the functional qualities and the appropriate value for money ratio into account. Thanks to a combination with dispensers it is possible to refill the necessary number of sheets. The optimal combination of raw material and microembossing with little waves is a functional and aesthetic solution for bathrooms and toilets.

ROLLED HAND TOWELS AND INDUSTRIAL ROLLS

ROLLED HAND TOWELS AND INDUSTRIAL ROLLS

If a larger surface needs to be washed or wiped, the rolled paper towels, which are becoming more and more preferred, are an ideal choice. Long winding helps keep the places with high frequency of visitors hygienic and clean, such as industrial halls, hotel kitchens and in the areas where the high consumption of paper towels is present. The winding length and raw material is adapted to various types of facilities in which the paper towels are used. In combination with dispenser allowing the dosing of single sheet is it possible to optimise their consumptions and the hygiene becomes not only functional but also economical solution.

KITCHEN TOWELS

KITCHEN TOWELS

Keeping the hygiene is important for smaller facilities too where the consumption of paper towels is not so high. These facilities are e.g. smaller cafés, bars, kitchens, hairdressing salons, beauty salons. These facilities need to have the towel at hand and it should not take much space. An innovative technology of embossing supports the higher absorption, firmness and higher volume of the towel. Visual effect of embossing fulfils not only functional but also aesthetic function. The paper towels are a functional, aesthetic and easily storable solution thanks to the combination of different parameter.

TABLEWARE

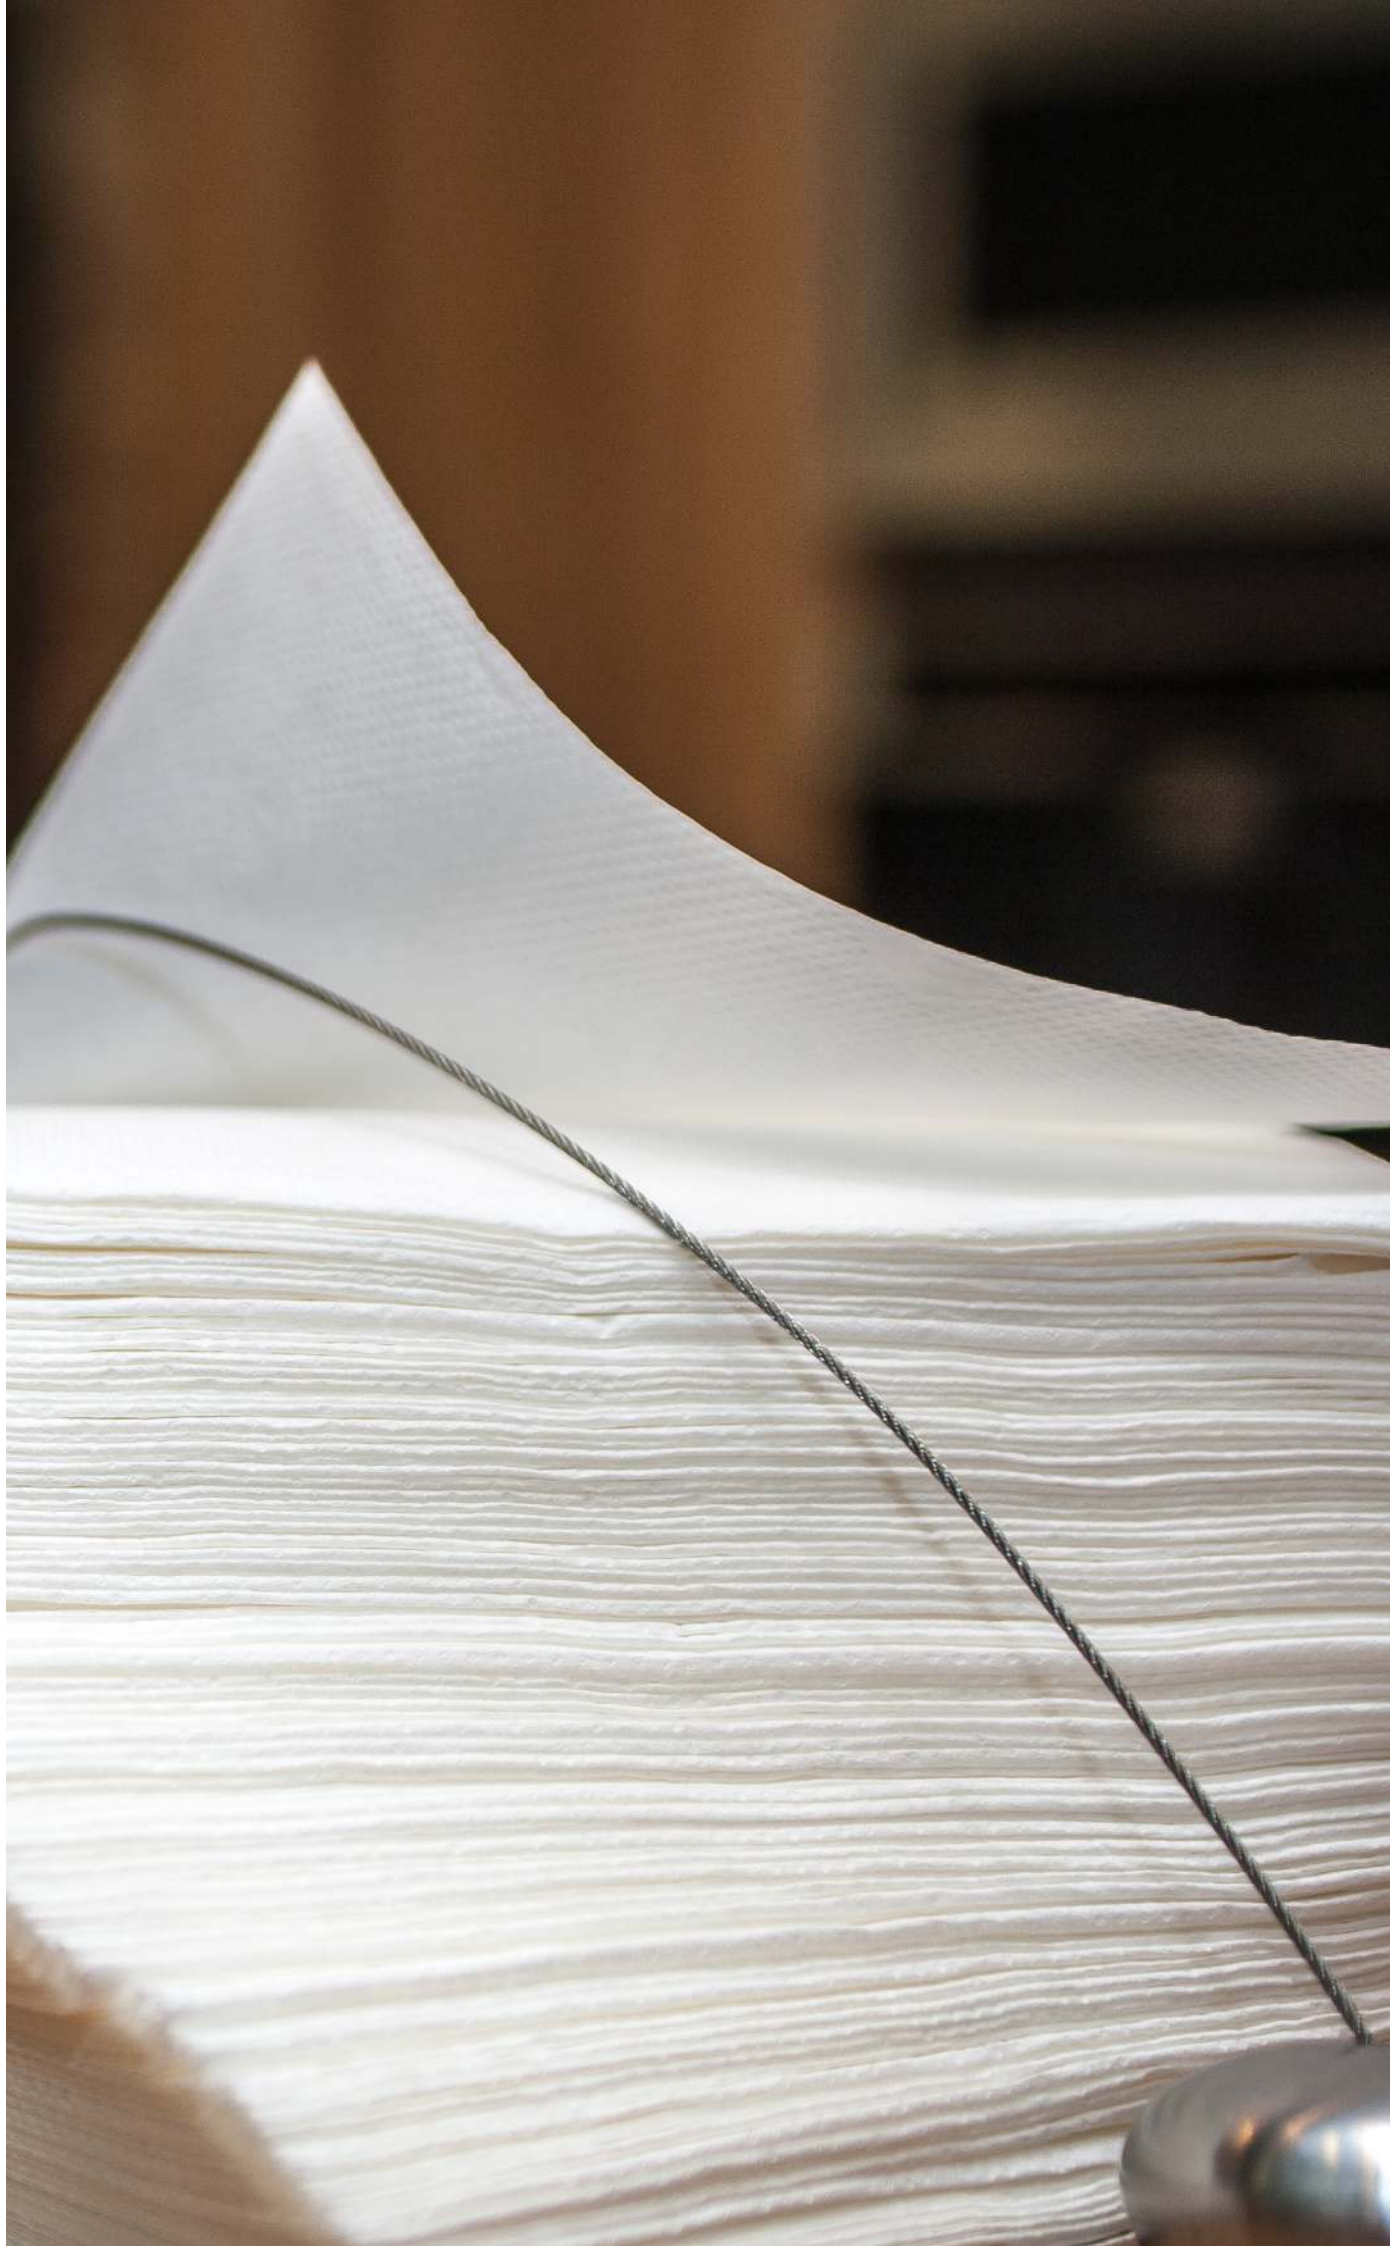

TABLEWARE

Napkins are the everyday part of HORECA facilities which can liven up and make the interior of a facility more pleasant during an ordinary day or special occasion. The customers require functionality of napkins, sufficient size of a package, quality, and diversity. Pastel and varied colours, tasteful print on the edge, gold and silver ornaments are preferred (TNS, 2015). At special occasion the dining can be improved with runners and table mats.

- **ECONOMIC NAPKINS**

DISPENSERS

DISPENSERS

Dispensers are an inseparable guide of the paper hygiene and play an important role in the decision-making process. The customer expects a complex service that includes delivery of dispensers too. An ideal dispenser is a universal one with large volume, simple design, reliable functionality and is resilient to damage. The design plays an important role in the above-standard and luxurious areas such as hotels, restaurants, wellness centres, shopping centres or representative areas of firms and institutions. The most desired are white dispensers made of strong plastic that are associated with cleanliness and can be maintained easily (TNS, 2015).
