

# WATERKING XL

Innovative wet/dry vacuum with many extras and high performance.

Professional Cleaning Equipment

### Suggested Use

The successful WATERKING - series has been extended with the "XL" in the 45-litres range.

Previous benefits have been retained and selectively enhanced to make the WATERKING XL the ideal companion for thorough cleaning. 260mbar vacuum at 70l/sec airflow combined with 450 mm wide floor nozzles ensure sufficient performance and perfect results at all times. The innovative locking brake on the sturdy chassis prevents the vacuum cleaner from rolling away during use. The large easy-to-remove push bar permits comfortable handling and easy transport. With the standard drain hose, accumulated dirt is washed away leaving no residue.

The mechanical vacuum power control permits the optimum level for any surface. A powerful electrical outlet enables the use of additional cleaning tools directly through the vacuum cleaner. Optimal handling with accessory storage, cord rewind, locking brake and ergonomic handle make the vacuum cleaner fit for daily, professional use.

Sturdy chassis made of impact-resistant plastic with removable push bar (no tools required) and large rubber wheels.

A powerful electrical outlet enables the use of additional cleaning tools directly through the vacuum cleaner.

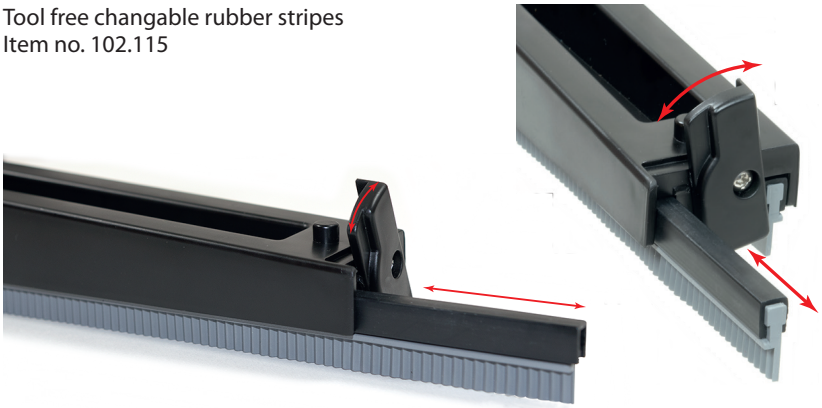

The locking brake can be operated from either side and prevents the vacuum cleaner from rolling away.

Dirtwater draining hose for easy emptying of the container.

Tool free changable rubber stripes  
Item no. 102.115

TECHNICAL DATA	
Voltage	220-240 V / 50 Hz
Max. power	1300 W
Power socket	Max. 1500 W
Sound pressure level	70 dB(A)
Volume flow rate	70 litres / sec.
Max. suction	260 mbar
Container material	plastic
Container volume	45 litres (gross)
Length of power cord	10 m
Length of hose	3 m
Diameter of hose	38 mm
Diameter of tubes	38 mm
Weight	15 kg
Dimensions (L x W x H) (cleaner without push bar)	49 x 44 x 77 cm

Accessory: Extremely robust metal floor nozzle 450 mm  
Item no. 102.051

### Features

- Outstanding water/dirt intake
- Consistent separation of cooling and processed air
- Reliable floating gauge even reacts during heavy foam growth
- Cyclone water separation system
- With large rubber-coated swivel casters and back wheels
- Robust chassis with removable push bar
- Locking brake to prevent vacuum cleaner from rolling away
- Dust-free dirt disposal through sealable fleece filter bag

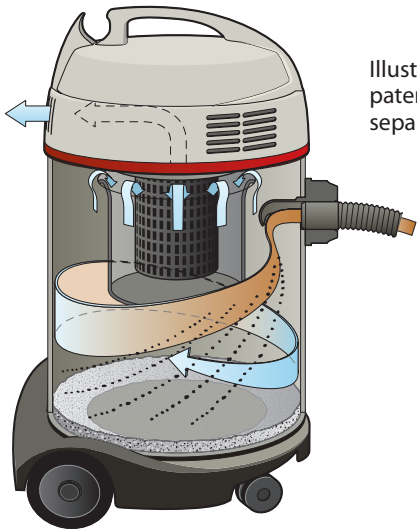

Illustration shows patented water separator system.

Due to the twist of the intake nozzle, the spray-fog is consequently separated when it reaches the container wall. Additional filters are no longer necessary. The reliable floating gauge even reacts during heavy foam growth. Cooling air slots located on the side ensure the consistent separation of cooling and processed air.
