Professional Cleaning Equipment

# TITAN

High-performance orbital machine with excellent cleaning results and safe operation.

The orbital technology combines two types of motion to achieve a higher mechanical cleaning effect while reducing the use of chemistry and protecting the environment. The interplay of eccentric and rotating movements generates a special efficient cleaning pattern and thus differs from classic single-disc machines, which perform a pure rota-

tional movement. In terms of smooth running, the orbital method also has a very positive effect on handling and makes it possible to drive the machine in a safe and fatigue-free manner at all times. Even inexperienced users can quickly become familiar with the Titan and achieve excellent work results in the shortest possible time. The areas of

application in basic and maintenance cleaning, polishing, and scrubbing on all floor coverings (carpet, stone, PVC, wood, safety tiles) are almost limitless.

Advantages of the orbital machine in comparison to a single-disc machine.

- less water
- less chemicals
- less time
- less effort
- mounted cleaning area 100% (see right)

Thanks to significantly higher mechanical cleaning effect!

Tilting drawbar for increasing the contact pressure.

Excellent stairway mobility and stability.
