

SMARTSCRUB™

The Power to Clean and Shine in Just One Step

- Labor savings, reduces/eliminates the need to burnish
- Highly durable and lasts 5X longer than traditional floor pads
- More efficient cleaning than competing brands
- Brightly colored wear indicator takes away the guesswork
- Environmentally preferred with **Green Seal®** certification
- Versatile, can be used with many flooring substrates, coated/uncoated
- Designed to be used wet on an autoscrubber or single-disk rotary machine
- Reduces dust in work environment
- Chemical free, works with just water

Full Cycle® products are certified by **Green Seal®** for Environmental Innovation based on faster biodegradation in landfill conditions and 100% recycled content/natural fiber.

FAQ

SMARTSCRUB™

Can SmartScrub™ be used on a high speed (burnishing) machine?

No, it is designed to use wet on low-speed auto scrubbers and single-disk rotary machines (175 – 350 rpm).

Is SmartScrub™ used wet or dry?

Use wet with just plain water or a neutral cleaning solution.

What types of floors is SmartScrub™ designed for?

SmartScrub™ is designed to be versatile and performs well on VCT, vinyl, sheet vinyl, ceramic tile, stone, terrazzo, concrete, marble, granite, and rubber.

Why is SmartScrub™ better for the work environment?

The wet process and low-speed machine does not create dust in the work environment.

Why does SmartScrub™ save time and money?

SmartScrub™ saves a step by reducing and/or eliminating the need to burnish floors to obtain a beautiful polished look. It reduces material, labor, and equipment cost. **SmartScrub™** is more durable and lasts 5X longer than traditional floor pads. Traditional scrubbing and cleaning pads have a pad life expectancy of 75,000-100,000 square feet, compared to **SmartScrub™** at up to 500,000 square feet. The cost per use is a fraction of traditional pads.

What is the construction of the SmartScrub™ pad?

Americo® SmartScrub™ pads are manufactured using 100% recycled polyester fibers bound by a proprietary water-based resin system and a micro-abrasives coating.

Can I use SmartScrub™ pads for floor stripping?

SmartScrub™ pads are not designed to be used as a stripping pad or to be used with floor stripping solution. SmartScrub™ is designed to clean and shine floor surfaces.

Can I use SmartScrub™ pads for deep scrubbing and recoating applications?

SmartScrub™ pads are not designed to remove layers of floor finish and are not recommended to be used in deep scrubbing and recoating applications.

How can I increase the life of the SmartScrub™ pad?

Avoid rough floor surfaces, expansion points, and transition thresholds.

It is not recommended to launder SmartScrub™ pads. Pads should be rinsed with water between uses.

Rinse pads regularly to remove dirt and debris.

Flip the pad each day instead of running one side to the end of its life before using second side.

Inspect the equipment to make sure the driver heads are level and applying equal pressure to the floor pad. Use the least amount of possible down pressure to achieve desired cleaning results.
